Rocks And Minerals (Science Readers: Content And Literacy)

Synopsis

Learn all about rocks and minerals and how we study them. Almost all rocks are made of minerals. Learn about the three different types of rocks: igneous rocks, sedimentary rocks, and metamorphic rocks. A rock can even transform over millions of years from one type of rock to another during the rock cycle. Easy-to-read text paired with vibrant images keep students engaged from cover to cover. This reader also includes instructions for an engaging science activity where students can see how crystals form. A helpful glossary and index are also included for additional support. About Shell Education Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.

Book Information

Lexile Measure: 500 (What's this?)

Series: Science Readers: Content and Literacy

Paperback: 32 pages

Publisher: Teacher Created Materials; 1 edition (November 15, 2014)

Language: English

ISBN-10: 148074610X

ISBN-13: 978-1480746107

Product Dimensions: 7 x 0.3 x 9 inches

Shipping Weight: 3.2 ounces (View shipping rates and policies)
