Reintervention In Endodontics

Synopsis

The days of compromised retreatment are over. This book helps practitioners navigate each stage of endodontic retreatment successfully, from understanding the indications for retreatment to optimal reobturation of the canal. Written by a team of experienced specialists, this exceptional textbook explores the various options and approaches for retreatment and relies on evidence from the literature and experience from clinical practice to make recommendations for the most predictable protocols and techniques. The authors present the parameters for initial success in endodontic treatment and discuss the latest materials, tools, and technologic resources for use in endodontic retreatment. They cover the management of complications, including optimal techniques for correction of canal access and locating canals, even those that are calcified.
