Customer Reviews

"Concept mapping has been around for a long time, but nurses have difficulty implementing it The new chapter made it simple. Instructors can introduce one concept at a time and be sure it is understood before moving to the next concept. I appreciate the simplicity of the chapter and how it made the steps more understandable."Patty Hawley, MSE Allied Health Technology, Ferris State University, Big Rapids, MI

Wanda Seaback, RN, MS, is a Professor of Nursing at Texas A&M University, Health Science Center, College of Nursing, Bryan, TX. She has been a nurse educator for sixteen years and has taught courses for PN/LVN, Associate Degree Nursing (RN), and BSN (RN) programs.

132 pages, tiny book, too expensive! not worthy at all. you can look the information online!

Great condition!

This book will be used in a future class Purchased as a gift for a future nurse

The book was ok. It did not contain a list of the Nursing diagnoses which I needed for class. I had to look them up elsewhere. Very time consuming. The last edition was better. Also, the delivery was very slow. I received it two weeks after my class started.

Don't be surprised when you receive this book and it's tiny. Small book, huge price but is a great educational tool! Totally worth the cost.
