Peterson Field Guide To Moths Of Southeastern North America (Peterson Field Guides)

Synopsis

The best-selling field guides of all time — Thousands of species of moths can be found in the American Southeast, of which only a tiny handful are household or garden pests. Far from being all drab grays and browns, moths are actually amazingly varied. Many bear swaths of pink, yellow, or green, or have intricate patterns of swirls or stripes. — Some mimic wasps or beetles, while others imitate thorns or broken twigs. There are species that resemble colorful butterflies, and others that could be mistaken for tiny hummingbirds. With helpful tips on how to find and attract moths, range maps and seasonality graphs showing when and where to expect each species, as well as more than 2,300 photographs that have been digitally manipulated for easy comparison, this guide provides everything an amateur or experienced moth-watcher needs. — Sponsored by the National Wildlife Federation and the Roger Tory Peterson Institute

Book Information

Series: Peterson Field Guides

Paperback: 640 pages

Publisher: Houghton Mifflin Harcourt (March 13, 2018)

Language: English

ISBN-10: 054425211X

ISBN-13: 978-0544252110

Product Dimensions: 4.5 x 7.2 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Customer Reviews

SEABROOKE LECKIE is a freelance writer and naturalist who became interested in moths after realizing they suited her night-owl tendencies much better than birds. She lives in eastern Ontario with her husband and two young kids, with whom she enjoys roaming their rural yard and discovering its inhabitants, six-legged and otherwise. — DAVID BEADLE is a professional freelance bird illustrator who happens to have a passion for moths. He has been interested in moths for over thirty — years, both in his native UK and in Ontario, Canada. For the past two decades he has traveled extensively within Ontario documenting and photographing moths. He has a particular

interest in identification and feels it is important to portray these fascinating creatures alive and in their natural resting positions.
