Best Sellers Rank: #4,110,820 in Books (See Top 100 in Books) #81 in Books > Children's Books > Sports & Outdoors > Cycling #680 in Books > Children's Books > Science, Nature & How It Works > Inventions & Inventors #8090 in Books > Children's Books > Cars, Trains & Things That Go

Age Range: 8 - 10 years

Grade Level: 2 - 4

Customer Reviews

Grade 3-5 - Three simple surveys with large-print type and black-and-white and full-color images on nearly every page. Bicycle looks at early models with wooden wheels and pedals, which were added in 1839; the Starley Rover; the Schwinn Stingray; and mountain bikes of today. One section includes the science behind how bicycles work and a hands-on experiment explores how changing gears changes tire rotation. Amy Pinchuk's *The Best Book of Bikes* (Maple Tree, 2003) provides a more in-depth treatment of the subject. The second title explores the history of the camera from early attempts to capture images to digital photography. One section explains how the image is captured through the shutter and formed on the film. Carin T. Ford's *George Eastman* (Enslow, 2004), Kenneth P. Czech's *Snapshot* (Lerner, 1995), and Joseph E. Wallace's *The Camera* (Atheneum, 2000) are more focused choices. Nobleman charts the work of major inventors who contributed to the television as we know it today. The essential technology is relatively unchanged in the last 65 years. These titles are serviceable, well organized, but very broad introductions. -
