Customer Reviews

Sherri Betz, PT, GCS, CEEAA, PMA-CPT, has been a Physical Therapist since 1991, international presenter, Polestar Principal Educator/Examiner, Gyrotonic/Gyrokinesis™ Instructor, nominated for APTA Geriatric Clinical Specialist Award 2004, author of The Osteoporosis Exercise Book, creator of modified Pilates videos for special populations & is pioneering research in Pilates for Osteoporosis and Geriatrics. Sherri owns TheraPilates Physical Therapy and Gyrotonic Clinic, in Santa Cruz, CA, serves on the Professional Education Committee for FORE (Foundation for Osteoporosis Research & Education) and is the Secretary for the Pilates Method Alliance Board of Directors.

Good for beginners or those who've just been diagnosed with osteoporosis or osteopenia

I was trained in Pilates during physical therapy for my pelvis. When I found out that I had severe osteoporosis, due to an illness of malabsorption/malnutrition, I discovered that many of the Pilates

exercises could put me at risk for fracture. This book shows exercises and daily movements that are safe for an osteoporotic spine, so I now live in hope of not fracturing.

Was looking for more challenging exercises than what was in the book. Book was very basic.

If you have not been active in your life and are looking for safe exercises, this would likely be a good book for you. However, if you have exercised (and still are) most of your life, this book is way too basic. I would not have purchased it had I known that. Still, it could be very useful for some people, just not for me.

This is a great beginning book if you are learning about Osteoporosis. The information was clear and concise and easy to apply.
