Jeremy Borum argues with electrifying clarity that a film composer today must be a warrior with a multitude of survival skills. He and his widely experienced interviewees explain the why and the how, in an essential guide for every practicing and would-be composer for visual media. (Bill Elliott, professor, Berklee College of Music)What a great book! I've been addressing some of these subjects for several years in my USC class, but nothing as thorough and all-encompassing as Borum has accomplished. He has addressed all of the current scoring issues with forthright and honest information. This book will be an invaluable tool for our next generation of film composers. I will certainly be adding it to the top of my mandatory reading list for my class. (Eric Schmidt, professor, USC Thornton School of Music)Your book is awesome and I cannot wait for it to be officially available. I'll assign it to all my students as a mandatory read, and will adopt many advices from it in my own artistic and professional career. (Milica Paranosic, professor, The Juilliard School)Guerrilla Film Scoring contains a lot of practical knowledge, and it systematically breaks down the realities and challenges facing film composers today. The book includes very useful

contributions from professionals, and it will certainly be useful to anybody in the field of scoring. (Peter Neff, professor, UCLA Herb Alpert School of Music) This book provides useful and timely insights into the commercial realities of Hollywood filmmaking and the evolving nature of film music practice. This should be required reading for any aspiring screen composer. (Vasco Hexel, Area Leader Composition for Screen, Royal College of Music, London) Jeremy Borum has done something quite extraordinary. He provided a highly organized and comprehensive summation of what a film composer needs to know about the industry today. This is different from the books one finds in stores, in that it is written from an insider's point of view. In that way it is unique. (Richard Danielpour, Grammy-winning composer; professor, Manhattan School of Music and Curtis Institute of Music) This is the sort of book I've been hoping someone would write for a very long time. It's an important practical outlook on the contemporary realities of scoring, and it will become part of my curriculum immediately. (Barry Schrader, professor, California Institute of the Arts) This book fills a needed gap. There are several good technical books about film scoring available to students. But there hasn't been until now a book offering detailed, sage, and keenly practical advice about how to organize one's working life as a film composer and navigate one's way towards a successful career. I highly recommend this book to every aspiring student of film composition. (Edward Green Ph.D, professor of composition, Manhattan School of Music; Composer-in-Residence, Imagery Film, Ltd.) I was immediately impressed with the easy access to the video clips online. What a great way to provide personal insights from composers from within the text! Guerrilla Film Scoring is a timely and well-informed book, full of relevant information for composers interested in entering the ever-evolving waters of film scoring. (Don Wilkins, Film Scoring Chair Emeritus, Berklee College of Music) Very entertaining, and gives great advice to the newcomer while assuring more established composers that they're on the "right" path. (Patrick Kirst, professor, USC Thornton School of Music) I like this book very much. It's the only one of its kind: informative, insightful, and pulls the mask off every aspect of the industry's practices. It identifies what the composer needs to know, what he/she is up against, and addresses film composition from the vantage point of what composers face in reality: low-budget, do-it-yourself production vs. the studio block-buster scores that most of the students believe they'll be working on. They may some day, but to get there they'll be facing exactly what is described in the book. I believe it should be required reading for every student thinking of a career in scoring for media or one that has already entered the trenches. (David McHugh, director of Music Composition for the Screen, Columbia College Chicago) I founded and direct a film scoring program at California State University, Northridge and I intend to make this

remarkable book required reading for my students. Jeremy Borum nails it with pithy quotes and street-level advice for the current scoring scene. Indeed this is "guerrilla" work. It takes guts, skill, talent, preparation and the ability to continually evolve to succeed. Jeremy's book should be front and center on every commercial composer's desk. Enhanced with valuable advice from major figures active in the industry, Guerrilla Film Scoring equips students with powerful ammunition and strategic tactics to fearlessly conquer the film, video game, and multimedia scoring worlds. He has broken down the complex, challenging and often hair-pulling world of film scoring into sensible, digestible bites. The advice from the pros is very illuminating. Guerrilla Film Scoring should be in the library of any modern composer, and would be a worthwhile addition to any curriculum that deals in music for media. (Steven Mark Kohn, director of Electronic Music Studies, The Cleveland Institute of Music) A must-read for anybody interested in composing for films or media, and suitable for academic courses as well. Veteran composers contribute multiple perspectives throughout the book. Each chapter is chock-full of practical advice and information for self-motivated composers interested in not only surviving, but thriving in the current film and media music scene. Guerrilla Film Scoring should be required reading for anyone considering a career in composing for media. In short, it provides a sobering reality check through an in-depth look at seemingly every aspect of the business. Borum takes no prisoners in his thoroughgoing and detailed assessment of what one needs to know and do to have a career as a composer for film, TV, games and any media that requires music. I've been in the music business for almost thirty-years, and although I am primarily an instrumentalist and not a composer (although I have an avid interest in composition and specifically songwriting), everything in the book rings true. Indeed, there is information in this book that is as important for instrumentalists, copyists, orchestrators and music editors as it is for composers. As with any informative, single-focused book the reader will find things that may or may not be as important or as essential as Borum suggests. Nevertheless, all of

what Borum says needs to be dealt with one way or the other by any aspiring media composer. As corny as it sounds, don't read it at your own risk. Or, put another way, it's a must-read.
