# A VISUAL COURSE OF MODELLING TECHNIQUES: 170 Pictures Showing How To Model Bas-reliefs And High-reliefs

## Synopsis

**A VISUAL COURSE OF MODELLING TECHNIQUE** This is the first in a series of visual courses in which I will share my long experience as a sculptor and designer with my readers. Through 170 photos and 4 practical exercises you will discover the techniques and procedures for making bas-reliefs and high-reliefs. The pictures will help you carry out your work step by step: they show the proper positions and moves of the hands and tools in modelling. The text also has a lot of technical information about clay and tools. The course starts with a simple practice exercise and ends up with more complex assignments like modelling human figures and portraits. You can find information about my works at [www.fabriziosavi.com](http://www.fabriziosavi.com)

## Customer Reviews

I liked this book, as it was just on my tablet I had trouble printing any of the pictures which would have been helpful to me. I did a couple of the projects and was surprised at how good they turned out following his instructions. I did not make in his size which was huge. Enjoyed the book and will

continue to try the rest of the projects.

Excellent resource for anyone who wants to sculpt in relief (which is something I've never been able to find much information on). I only wish it was 4 times as long with detailed videos of each sculpture :)

Very well written and easy to understand. Pictures show the techniques described very well. Good for beginners to learn how to sculpt

I love how detailed this book is for a beginner, plenty of photos as well.

Nicely presented, but I was disappointed that it was not as in depth as I had hoped. Not much information on development beyond the first couple of steps..

A wonderful. Book

Wish there had been more examples, but Savi gives three nice comprehensive lessons on the basics.

superb
