# Baby Loves Aerospace Engineering! (Baby Loves Science)

## Synopsis

Big, brainy science for the littlest listeners. Accurate enough to satisfy an expert, yet simple enough for baby, this book explores the basics of flight – from birds, to planes and rockets – and ties it all to baby’s world. Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby’s sense of wonder. Parents and caregivers may learn a thing or two, as well!

## Book Information

Series: Baby Loves Science

Board book: 20 pages

Publisher: Charlesbridge; Brdbk edition (October 4, 2016)

Language: English

ISBN-10: 1580895417

ISBN-13: 978-1580895415

Product Dimensions: 7 x 0.6 x 7 inches

Shipping Weight: 8.8 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 59 customer reviews

Best Sellers Rank: #3,271 in Books (See Top 100 in Books) #3 in Books > Science & Math > Physics > Mechanics #4 in Books > Children’s Books > Education & Reference > Science Studies > Astronomy & Space > Aeronautics & Space #8 in Books > Children’s Books > Humor > General

Grade Level: Preschool and up

## Customer Reviews

Ruth Spiro’s debut picture book, LESTER FIZZ, BUBBLE-GUM ARTIST, was a Bank Street College of Education Best Book of the Year. She lives in Chicago, Illinois. From the eBook edition.

Grandpa works for ATK designing rockets, so this was a great addition to our son’s library. He loves it. The science is simple and cute, and he finds the pictures engaging.

Bought for my one year old son. It’s a perfect short, simple bedtime read. I love the illustrations and the simplicity. We plan to order more books from this series.

A great book and a great gift babies that have science oriented parents! Great for any child though!

While educational, it is also a good book for babies because of the great illustrations and colors, meaning babies will enjoy at any age!!

Children love the book. Love the illustration

fun little book - my 3 year old loves it!

Cute little book. Is it basic? SURE. Then again, if you're going to read a very short little story, why not read a constructive one? It's more or less just that birds and planes can fly based on the shape of their wings, flat on bottom, round on top; but they don't go into space, a rocket is needed for that. In VERY basic baby version. For a two-year old, a three-year old, sure. It doesn't take more than a couple of minutes to read, even if one points out the pictures, discusses etc.

My son loves these books, his favorite so far is Baby Loves Quarks but he enjoys this one as well. The art and pacing on these books are great! The Baby Loves books will be my go to gift for new parents.

Such a cute book for all the little ones interested in things that fly :)
