# Shaping Space: The Dynamics Of Three-Dimensional Design

## Synopsis

As a guide to introductory three-dimensional design or sculpture, SHAPING SPACE offers an in-depth exploration of the aesthetic and practical considerations of working in three dimensions. Discussions of technique cover a range of media, including assorted fibers, ceramics, and even virtual design using the computer as a tool. Suggested studio projects provide structured assignments that relate directly to textual materials.

## Book Information

Paperback: 288 pages

Publisher: Cengage Learning; 2 edition (October 31, 1995)

Language: English

ISBN-10: 0030765463

ISBN-13: 978-0030765469

Product Dimensions: 0.5 x 8.2 x 10.2 inches

## Customer Reviews

Great art work and descriptions within the book; I used this book for my 3D design class in college. You don't necessarily need the latest edition, same content in the book regardless, the primary difference is that the later book is in black and white while the newest is in color. Or at least that is the only real significant difference I have seen.

My husband teaches basic sculpture in a university. He said this book teaches 3D design using the basic elements and principles which make construction much easier to understand for a new student. The book was in terrific shape and came with in 2 days. It is a must have for anyone needing to figure out the fundamentals of design in 3D construction.

Good book for what I needed it for. Helpful resource for school

great

Received exactly as it was described to me.

It was for my daughters class at the university very good book

informative, has many examples, great index in outline format. Would recommend this book to anyone taking a 3D art course, especially sculpture courses

Great book, wretched price. Still, what's a student to do?
