## Customer Reviews

There were a lot of good reviews for this book and bought this book from . Initially, it was not what I had expected, I was disappointed with this book. Then I forced myself to read through this book (just a few pages) and I also forced myself to follow a few of the methods that were mentioned in the book. It did really work for me. I followed the affirmation technique (in my own way, whenever I had time and did not schedule any specific time in the morning or night), it was very effective. I was amazed at the results. This book is worth trying and I am sure all the good reviews about this book are correct. I have not read the full book or practiced the other techniques though.
