Cosmic Catastrophes: Exploding Stars, Black Holes, And Mapping The Universe

Synopsis

From supernovae and gamma-ray bursts to the accelerating Universe, this is an exploration of the intellectual threads that lead to some of the most exciting ideas in modern astrophysics and cosmology. This fully updated second edition incorporates new material on binary stars, black holes, gamma-ray bursts, worm-holes, quantum gravity and string theory. It covers the origins of stars and their evolution, the mechanisms responsible for supernovae, and their progeny, neutron stars and black holes. It examines the theoretical ideas behind black holes and their manifestation in observational astronomy and presents neutron stars in all their variety known today. This book also covers the physics of the twentieth century, discussing quantum theory and Einstein's gravity, how these two theories collide, and the prospects for their reconciliation in the twenty-first century. This will be essential reading for undergraduate students in astronomy and astrophysics, and an excellent, accessible introduction for a wider audience.

Book Information

Paperback: 358 pages

Publisher: Cambridge University Press; 2 edition (August 21, 2014)

Language: English

ISBN-10: 1107437911

ISBN-13: 978-1107437913

Product Dimensions: 6 x 0.8 x 9 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Customer Reviews

"Wheeler's exposition uses elegant word descriptions based on deep physical insight, rather than mathematical expressions, and thus the book is accessible to nontechnical persons.... A sweeping survey, comprehensive and well written." -Choice2007 Outstanding Academic Title -- Choice Magazine "...a scholarly yet readable account of violent events in the Universe...The author is one of the world's leading experts in these fields and he writes with immense authority...I have no doubt that it will run to many editions." --Patrick Moore: BBC Sky at Night "A great deal of information is

packed into this small book...all of it explained in Wheeler's extremely lucid fashion...Five or six thumbs up for this one!" --Review from the Online Bookstore of the American Association of Variable Star Observers

From supernovae and gamma-ray bursts to the accelerating Universe, this will be essential reading for undergraduate students in astronomy and astrophysics, and an excellent introduction for a wider audience. This fully updated second edition incorporates new material on binary stars, black holes, gamma-ray bursts, worm-holes, quantum gravity and string theory.

Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe
DARK ENERGY: The Biggest Mystery In The Universe (dark matter, how the universe works, holographic universe, quantum physics) (black holes, parallel universe, the string theory)
The Extravagant Universe: Exploding Stars, Dark Energy, and the Accelerating Cosmos (Princeton Science Library)
Astronomy: Astronomy for Beginners: Discover the Amazing Truth about New Galaxies, Worm Holes, Black Holes and the Latest Discoveries in Astronomy
Astronomy: Astronomy For Beginners: Discover The Amazing Truth About New Galaxies, Worm Holes, Black Holes And The Latest Discoveries In Astronomy (Astronomy For Beginners, Astronomy 101)
Mapping America: Exploring the Continent (Mapping (Black Dog))
Stars, Planets, Nebulae, and Black Holes | Children's Science & Nature
The Mysterious Universe: Supernovae, Dark Energy, and Black Holes
An Introduction to Black Holes, Information And The String Theory
Revolution: The Holographic Universe
147 Things: My User's Guide to the Universe, from Black Holes to Bellybuttons
Stars! Stars! Stars! Colorado: Mapping the Centennial State through History: Rare And Unusual Maps From The Library Of Congress (Mapping the States through History)
Massachusetts: Mapping the Bay State through History: Rare and Unusual Maps from the Library of Congress (Mapping the States through History)
John's Gospel: The Cosmic Rhythm -Stars and Stones
The Cosmic Perspective: Stars and Galaxies (8th Edition) (Bennett Science & Math Titles)
Dad's Book of Awesome Science Experiments: From Boiling Ice and Exploding Soap to Erupting Volcanoes and Launching Rockets, 30 Inventive Experiments to Excite the Whole Family! (Dads Book of Awesome)
Fire Bubbles and Exploding Toothpaste: More Unforgettable Experiments that Make Science Fun (Steve Spangler Science)
Cold, Hungry and in the Dark: Exploding the Natural Gas Supply
Myth
Edge of the Universe: A Voyage to the Cosmic Horizon and Beyond
The Copernicus Complex: Our Cosmic Significance in a Universe of Planets and Probabilities
