My Visit To The Dinosaurs (Let's-Read-and-Find-Out Science 2)

Synopsis

Dinosaurs are extinct now, but you can visit dinosaur skeletons in a museum. There you will meet Brachiosaurus, Stegosaurus, and Diplodocus and learn how they ruled the earth millions of years ago. You'll see dinosaurs with over 1,000 teeth, dinosaurs who could swim, meat-eaters and plant-eaters. And, of course, you'll meet the king of all dinosaurs, the gigantic Tyrannosaurus rex.

Customer Reviews

PreSchool-Grade 2 Like the original edition, this book introduces young children to dinosaurs through a visit to a natural history museum. The simple text explains how paleontologists discovered dinosaur bones and reconstructed the reptiles' skeletons from their fossilized remains. Also included are brief descriptions of the more well-known dinosaurs, accompanied by full-color illustrations of the creatures as they once appeared. The text of this edition varies little from that of the earlier book. It's the new illustrations that make this revision worth purchasing; Alikì's clear, full-color pictures provide just enough detail to maintain young children's interest without confusing them. Similar in content to Parish's *Dinosaur Time* (Harper, 1974) and Milton's *Dinosaur Days* (Random, 1985), Alikì's book is slanted more toward a young listening audience rather than beginning readers. Along with Alikì's *Digging Up Dinosaurs* (1981) and *Fossils Tell of Long Ago* (1972, both Crowell),

this book gives preschoolers an excellent introduction to paleontology and to the giant reptiles of long ago. Cathryn A. Camper, Minneapolis Public Library Copyright 1986 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

Good book for children who like dinosaurs

good information

Kids loved it!

My son loved this book. Great read, illustrations and not too challenging. My son read it several times and enjoyed sharing it.

I love this book. I've been using it with young children for many years.

Good museum visit book for early learners.

great book.

My 4 year old loved this book. It's just the right blend of story, science/identification of dinosaurs and has great illustrations. We read it twice in a row.
