ITMB Publishing (International Travel Maps and Books) of Vancouver, Canada, has published detailed reference and travel maps of countries, regions, and cities around the world since 1985. The company's titles include many that are unique or the first of their kind, including the first commercially available travel map of South America.

The Ethiopia Map is more than a map of intersecting lines to get from place to place. This map has snippets of information around the perimeter which give you not only a good grounding of the physical features of Ethiopia and the must see sights but there are points of history as well. The information is enlightening and intriguing enough to make you want to get an immediate booking to see these sights. There are practical tips as well about roads and routes to keep the would be

traveller forewarned. I would recommend this map not only to those thinking of a journey to Ethiopia but to the curious of this part of Africa.

The map is in the standard scale(for Ethiopia). However it is rather focused on entertainment and tourist friendly then traveler friendly. Poor quality of paper makes it much to easy to be destroyed
