Technology: Feats And Failures (TIME FOR KIDS® Nonfiction Readers)

Synopsis

With every new feat, there is at least one big failure. Learn about some of the biggest technological feats and failures in human history in this fascinating nonfiction title that allows readers to discover some of the technological innovations that have made life easier. Featuring detailed images, charts, and graphs, informational text, and intriguing facts, children will be engaged and captivated from cover to cover! About Shell Education Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.

Grade Level: 4 - 6

Customer Reviews

Books in this subset of the Time for Kids series feature plenty of historical high points and, for good

measure, some low points, too. According to a note, the content is based on a re-writing from TIME for Kids magazine. • While the use of many short sentences helps to make the books accessible, the text is brief and often superficial, as the series' small format and many illustrations leave little space for discussion. However, many good color photos do appear throughout the books. The brief articles in Technology highlight inventions such as penicillin, electric lights, the camera, and the wheel. Apart from a shout-out to early programmer Ada Byron, the perfunctory section on computer history mentions only three individuals: Babbage, Wozniak, and Jobs. A colorful paperback series with some appeal to browsers. Grades 4-6. --Carolyn Phelan

With a great emphasis on nonfiction in the Common Core Standards, these leveled nonfiction readers entertain while filling a curricular need. Conversational text and absorbing layouts with plenty of sidebars, questions to consider, facts, graphics and color photos will entice even the most reluctant of readers. A Wide-ranging and appealing series. --Booklist 2012
