Customer Reviews

I'd recommend that all those involved in captive care of bats have a copy --ABS Newsletter, October 2009 --This text refers to the Hardcover edition.

Susan M. Barnard holds a Bachelor of Science degree from the University of the State of New York. She founded Basically Bats - Wildlife Conservation Society, Inc. in 1993, and served as Executive Director until 2008. Currently retired from her position as Assistant Curator of Herpetology at Zoo Atlanta, Ms. Barnard has authored over 25 scientific papers in refereed journals and 2 book chapters. She also co-authored books on reptilian parasites and reptilian husbandry, and has appeared in numerous magazines and on television, including the National Geographic special, "Keepers of the Wild." --This text refers to the Hardcover edition.

This book has lots of information and pictures. It may be in black and white, but the pictures are plentiful. You will see real bats and drawings and exactly where to find the veins for blood draws, give injections at appropriate sites, nutrition, diseases, restraint and handling, and all the procedures that are performed on bats. Surgery is included, a list and pictures of supplies under the procedures, anesthesia, drug dose calculations, what food to feed them, common injuries, their entire anatomy, how to fix wing injuries, and the whole nine yards.

Wow! I'm a zoo vet and didn't know what to expect necessarily from this book, but we've been having some bat colony issues so I thought "what the heck?" I'm glad I did! This book is very complete and extremely helpful!
