# The Case For A Creator

## Synopsis

“My road to atheism was paved by science . . . But, ironically, so was my later journey to God.”

• Lee Strobel During his academic years, Lee Strobel became convinced that God was outmoded, a belief that colored his ensuing career as an award-winning journalist at the Chicago Tribune. Science had made the idea of a Creator irrelevant or so Strobel thought. But today science is pointing in a different direction. In recent years, a diverse and impressive body of research has increasingly supported the conclusion that the universe was intelligently designed. At the same time, Darwinism has faltered in the face of concrete facts and hard reason. Has science discovered God? At the very least, it’s giving faith an immense boost as new findings emerge about the incredible complexity of our universe. Join Strobel as he reexamines the theories that once led him away from God. Through his compelling and highly readable account, you’ll encounter the mind-stretching discoveries from cosmology, cellular biology, DNA research, astronomy, physics, and human consciousness that present astonishing evidence in The Case for a Creator. ## Customer Reviews

Lee Strobel is one of the best writers around. He deals with matters in an engaging way, sharing discovery rather than promoting dogma, in a manner which is simple and utterly lacking in pseudo intellectualism. The term "must-read" is used too frequently but in this case it actually applies.

I found this book well written and an excellent source of reference for further study. Strobel has a talent for interviewing scientists that are highly respected in their fields and asking the correct questions to weave the entire book into an interesting tapestry. A book that easily could have been a dry, boring, read is actually so interesting it is difficult to put down. I found myself reading and rereading it the first week I had it. I will keep it handy as a reference book.

THIS BOOK IS A GREAT GIFT FOR THOSE WHO HAVE QUESTIONS. I HAVE GIVEN IT TO SOMEONE THAT HAS CANCER AND IS DYING. SHE SOUNDS LIKE LEE IN THE BEGINNING. AM LOOKING FORWARD TO A FOLLOW UP CONVERSATION. THE TEEN IS IN A FAMILY THAT HAS LITTLE SPIRITUAL INPUT. I KNOW THIS BOOK WILL SPARK FURTHER CONVERSATIONS. I GOT THE 10 PACK SO I HAVE A FEW MORE TO GIVE. THANK YOU, LEE, FOR MAKING THE JOURNEY SO WE CAN PARTNER WITH YOUR GREAT ADVENTURE.

A good accumulation of the scientific evidences that point towards a creator. The book takes complex subjects and explains them in an intuitive way and gives references for further exploration. I enjoyed the read very much!

If you have doubts about whether Jesus is the promised Messiah you need to read this book. You will be left without reasons for doubting.

Fabulous book. It was my "main thing" until finished it. A friend, a nuclear engineer, is reading it now and has the same obsession. Strobel does what a journalist is meant to do, which is to seek out authoritative people to translate their technical theories and facts from their jargon into captivating language we can all comprehend. In this book he has located world-class authorities for each of his topics and lets them answer questions from his probing superb mind. Wow! I need to get that book back and read it again!

I love all of Lee Strobel's books "The Case for." This is a shorter book but gets straight to the meat of the matter for Christmas. Easy read.

Read this in one sitting. I bought it hoping for more facts on Christmas specifically, but the general apologetics from literature and archaeology were really good. Similar to his other books (Christ and Resurrection) but helpful nonetheless.
