If you are going to use this text as practice, please know that these are not actual tests AND that the reading passages in this text are longer than the passages on the actual test. The ACT is already a test of speed, and students have extra lines in these passages that can add up to almost a full extra reading. We recommend adding about 8 minutes to the time for the reading section.

Terrible. DO NOT purchase this book. I am yet to take a science test, but the math and reading are not indicative of the actual ACT. I don't think the writers of this book have ever taken the ACT before.

I recommend this book for anyone that just need to practice their test taking. This book would go best with a Dr. Steve Warren Math work book and Erica's English and Reading books. As for the test format compare to the actual test. It kinda of varies but the science section is very good.

Does the job it is supposed to do. There are some errors in the book. A few are pretty bad. But if you know what you are doing, they are not a problem. This happens when the test changes, as it has just done. In the new model the book editors put in some bad questions and bad answers. This can be annoying at times. Otherwise very good.

This is exactly what I needed for my kid to practice the ACT. A non online version of practice tests. I tear each section of the test out for him to do when he needs to work on it. Pretty straight forward.

Great resource. My son and tutor thought it was one of the best reviews and testing material to prep for the ACT.

The goods came quickly. I am happy with the book

My son used it, perfectly alright.
