# Chicken Soup For The Soul In Menopause: Living And Laughing Through Hot Flashes And Hormones

## Synopsis

A laugh-out-loud, pick-me-up collection of stories for the millions of women who are battling hot flashes, mood swings and mental lapses. As baby boomers hit their late forties and fifties, a record number of women are going through menopause. Whether they're in "active" menopause or just beginning to experience their first gray hairs and the hot nights of perimenopause, they'll find support, comfort and advice in this collection of stories from women who've been there and have survived. With chapters such as *What's Age Got to Do with It?*; *This Is Not Your Mother's Menopause*; *Mental-Pause*; *Hormones, Schormones*; and *Who Turned Up the Heat?*, women will gain renewed perspective on reaching the milestone of middle age, feel empowered by their changing identity and realize the innumerable ways in which menopause can impact them in a positive manner. *Chicken Soup for the Soul in Menopause* will show millions of women that there is light at the end of the tunnel.

## Customer Reviews

Jack Canfield and Mark Victor Hansen are the co-creators of the bestselling *Chicken Soup for the Soul* series. They live and work with women and know that it's best to put on a sweater than to fight for control of the thermostat. Dahlynn McKowen is a founder of Two Writers' Ink, a publishing consulting firm. At forty-three, she is experiencing her subject matter firsthand: hot flashes, decreasing eye sight and mental lapses.

Eggs Over My son, Graig, discovered Dr. Ruth when he was ten years old. He sat riveted to the television while I was preparing his favorite breakfast—French toast. As I was whipping up the eggs, I was half-listening as Dr. Ruth and a gynecologist were explaining menopause to the viewing audience. Suddenly, I was aware of a pair of eyes looking at me longingly. My son said nothing but continued to watch as I cooked. Finally, I asked if something was wrong. Wistfully, my son answered, 'Did you know, Mommy, that after menopause, you can't make eggs anymore?'

Pat Gallant The Positive Side of Menopause Menopause. It's a word loaded with associations—and usually not good ones. Hot flashes, mood swings, decreased sex drive, memory loss . . . these are the topics that are likely to pop up when you mention the 'M' word. But menopause isn't a disease—it's a normal, healthy part of your life. In fact, it can be a time of liberation, change and innovation. A time to take up new interests, make healthful changes in your lifestyle, and strengthen relationships with loved ones. A time for new beginnings. For many women, these are the years in which the children leave home. This means you can now invest more time in your career, explore hobbies you never had time for before, or go back to school. You can travel and spend more time with your spouse and friends. You can even have a romantic interlude with your husband again without your children interrupting! Menopause is also a time to focus on your health, and this too can provide a wonderful opportunity to make changes in your lifestyle. If you haven't already started an exercise program and a healthy way of eating, now is certainly the time to do it—you'll feel better, and you'll protect yourself against many diseases of aging. Don't forget that menopause isn't all about negative health changes. You'll no longer have to worry about PMS or unintended pregnancy—and for most of us, that's a very good thing!

Common Myths About Menopause . . . And Reasons Why You Should Question Them Myth: Menopause is a uniformly awful experience, something to be dreaded. Fact: Although women often do have some symptoms during menopause, there are ways to alleviate them. Many women find that menopause is a chance to focus more on themselves and make changes that will improve their health. Myth: Forgetfulness is a common symptom of menopause. Fact: Although you may feel as if you're constantly misplacing your keys or forgetting what you were about to do, in fact, there's no evidence that memory actually declines in women during menopause. Memory lapses during this time generally are caused by trying to do too many things at once. Menopause is not the best time for multitasking, especially with an infinite task list. Myth: Depression is common in menopause. Fact: While minor mood swings are common in menopause, depression is not a normal part of menopause. If you think you might be depressed, you should talk to your doctor, who can provide treatment if you are indeed found to be suffering from depression. Myth: Gaining weight is

inevitable during menopause. Fact: With regular exercise and a healthy diet, you can prevent weight gain during menopause. Myth: There aren't any alternatives to hormones to relieve menopause symptoms. Fact: There are some botanical products and antidepressants that may be helpful in relieving menopause symptoms. You can also make some lifestyle changes to help relieve symptoms. Besides, symptoms eventually go away, and with a positive attitude, they can be much more tolerable. Myth: Once a woman starts skipping her period, she can't get pregnant. Fact: You can still get pregnant even after you begin to miss periods. So unless you're trying to have a baby, be sure to use birth control until you haven't had any period for twelve months.

a fun read

This book will make you laugh and make you cry!! Sometimes I thought someone had been watching me through my house windows!! I had my husband read it and he could sympathize with many men that were in these women's stories.

I didn't like this book as much as other Chicken Soup for the Soul books. I have many that I have saved over the years and gave as presents but I didn't think was as good.

Most CSftS books make you misty for one reason or the other, but this one makes you nod your head in agreement and laugh out loud. I liked it so much I purchased 6 more to give as Christmas gifts. This is a really a MUST read !!!

This is the kind of book that you'll read parts of to whoever is around that can relate. It's fun and easy to read in small chunks, a few pages or stories at a time.

I bought this book for my mom and she loves it. She mentioned to me that the book was filled with short humorous stories regarding menopause. A great book for any woman who is dealing with this.

I have had quite a few laughs from this book. If you are looking for ideas of ways to ward off menopausal symptoms, this is not the book for you. If you are looking for ways to have some laughs and know you are not alone in menopause, this is the book for you! Warm, funny and oh so true menopausal stories.

This book will cheer you up and see that you are not the only one with the same symptoms and make you see the lighter side of it!
