I've been an customer for a bit now and been thinking of how to get into the market of selling in as I see a lot of people selling. One of the things I was interested in was how did fulfill the orders for some of the sellers. Interestingly enough I stumbled upon this book. The book has a good amount of information that answered a few of my questions. Good tips scattered here and there. And a few references about FBA as well. I just need to read up little more and I think I am ready to start getting into selling in .

This book really covers every part of selling on , from the moment you decide to sell your product to finding the right product and setting up your account to how to ship to and sell. Very informative and practical advice, a must-read for everyone who want to start selling on . I just set up my own account and started to sell and couldn't be happier to have found this book to help me guide through the process. Big thumbs up, thank you!

I am a big fan of social media and eCommerce websites and is on the top of my list. If you are like me, you probably hate having a nine to five desk job where you will probably be working for many years. However, now is the perfect time to create your own business even if you lack experience. Dan has created a guide for anyone to learn and establish a valid source of income. If done properly, you could leave your day job and work from home and make passive income. With hard work and dedication, success can be reached once you learn from this book.

Many instances of grammatical errors, but overall it is an informative and useful book.

No way this dude passed English class. I've never seen so many grammar errors in a book. What a shame, don't purchase this dumpster fire.
