# Basic Keyboarding For The Medical Office Assistant, Spiral Bound Version

## Synopsis

This is a basic keyboarding book for medical assistants, medical secretaries and transcriptionists that include medical terminology case histories, technical information, and medical timed writings that is needed for any medical facility and all personnel. New material includes in depth exercises for punctuation, grammar, and additional medical reports. The medical documents illustrate how to develop reports for the medical facility that includes consultation reports, pathology reports, history and physical reports, operative reports, and also how to format each document. Basic Keyboarding for the Medical Office Assistant includes a free CD-ROM that contains medical dictation that users can practice transcribing. The answers to the exercises are all within Unit 12 of the text, which allows for users to check their work.

Edna Jean Moss, BA, Instructor at Grossmont Health Occupations Center in Santee, California.

Southwestern Community College, Chula Vista, California, (instructor). She is a member of American Association of Medical Assistants, American Association for Medical Transcription, American Health Information Management Association and California Association for Medical Instructors.

The book and disc are exactly what I needed for class and much cheaper than buying brand new.

The book is in good condition better than I thought. I'm happy.

Book was missing pages, making me miss assignments for my class. Very disappointing

Liked the product. Great for class I am currently taking.

I am having a great time learning keyboarding with this book.

I had to have this book for a class. But was very disappointed, this book has numerous typos... which is not a good thing for a keyboarding book. Also the cd with this book is simply transcription dictations. You actually have to use Word or another word processing program. And since that is the case, there is NO instruction about what is being asked to do.
