With the onset of global warming and climate change, as well as the alarming number of diseases that have spread from one country to another, more and more people are returning to Mother Nature's way of growing and eating food. All across the globe, families and individuals are seeking for empty acreages or manageable tracts of land on which they can raise livestock, crops, and their family. You take a deep breath-- why, there's no taint of smoke or pollution at all! Instead, you find yourself inhaling the fresh aroma of a vegetable salad, with ripe tomatoes, crisp lettuce, and homemade cheese and vinegar. There is even a bowl of fruits picked right from your garden! Doesn't this sound like paradise? You can already picture your children living on this dream mini farm. But where is it? Where do you go for such fresh and delicious food? Most Mini Farmers start out in a place much different from their hometown. They often move to rural areas before starting their venture in self-sufficiency and reliance. While you can always take your entire family and search for a better place to live, there's nothing to stop you either from turning your current home into a haven for all things fresh and organic!
