Intellectual Property And Competition Law: The Innovation Nexus

Synopsis

'We in the United States have much to learn not only from Gustavo Ghidini's careful analysis of modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law.'

Book Information

Hardcover: 176 pages

Publisher: Edward Elgar Publishing (June 30, 2006)

Customer Reviews

The book ends with a comprehensive selection of the relevant bibliography. This part is all the more valuable to the reader as Ghidini does not simply list the relevant literature but puts it in its general context and comments on it. Ghidini's book is a fascinating trip through the system of IP laws.

--Beatriz Conde Gallego, *Intellectual Property and Competition Law*
Intellectual Property and Competition Law by Gustavo Ghidini provides a persuasively presented descriptive analysis of a distinctively European perspective on intellectual property law and its relationship to competition law. Professor Ghidini expertly presents the evolution of intellectual property laws and its contemporary manifestations with respect to the expansion of copyright law in technological fields and the inevitable conflict with patent law, the attempt at creating monopolies (such as in biotechnology), and so much more. A seminal work of impressive and articulate scholarship, *Intellectual Property and Competition Law* should be considered mandatory reading for students and researchers in the field of intellectual property rights and a very strongly recommended addition to academic library "International Economics" and "Judicial Studies" reference collections. --The Economics Shelf, *Midwest Book Review*. . . the provocative nature of this book is one of its great strengths, as are its cohesiveness and erudition. --Mel Marquis, *European Competition Law Review*

Gustavo Ghidini

"Intellectual Property And Competition Law: The Innovation Nexua" by Gustavo Ghidini (Professor of Intellectual Property and Competition Law, Luiss Guido Carli University, Rome, Italy) provides a persuasively presented descriptive analysis of a distinctively European perspective on intellectual property law and its relationship to competition law. Professor Ghidini expertly presents the evolution of intellectual property laws and its contemporary manifestations with respect to the expansion copyright law in technological fields and the inevitably conflict with patent law, the attempt at creating monopolies (such as in biotechnology), and so much more. A seminal work of impressive and articulate scholarship, "Intellectual Property And Competition Law" should be considered mandatory reading for students and researchers in the field of intellectual property rights and a very strongly recommended addition to academic library "International Economics" and "Judicial Studies" reference collections.
