Floods: Hazards Of Surface And Groundwater Systems (The Hazardous Earth)

Synopsis

There are many different types of floods, ranging from slowly rising regional floods to dramatic flash floods and coastal floods. Floods have become increasingly hazardous over the last 200 years, as people have been moving onto floodplains and modifying rivers, streams, and entire river systems. Human modifications to rivers and floodplains have resulted in more frequent, stronger, and faster moving floods. Considered the most common natural hazard, floods affect more people and cause more damage than any other hazard including earthquakes, volcanic eruptions, landslides, and tsunamis.

Book Information

File Size: 4051 KB

Print Length: 144 pages

Publisher: Facts on File (J); 1 edition (September 30, 2008)

Publication Date: September 30, 2008

Sold by: Amazon Digital Services LLC

Language: English

ASIN: B00EOGF16O

Text-to-Speech: Enabled

X-Ray: Not Enabled

Word Wise: Enabled

Lending: Not Enabled

Enhanced Typesetting: Not Enabled

Best Sellers Rank: #4,022,848 Paid in Kindle Store (See Top 100 Paid in Kindle Store) #85
