Study Guide For Wong's Nursing Care Of Infants And Children, 10e

Synopsis

Master pediatric nursing concepts and apply them to the practice setting! Corresponding to the chapters in Wong's Nursing Care of Infants and Children, 10th Edition, by Marilyn Hockenberry and David Wilson, this study guide reinforces your understanding of pediatric nursing with learning activities, review questions, and case studies with critical thinking questions. A variety of question types includes multiple-choice, matching, fill-in-the-blank, short answer, and true/false questions. Critical thinking case studies apply concepts to real-world practice. An answer key is included in the back of the study guide. Perforated pages allow you to submit assignments to your instructor. Key terms are accompanied by definitions and help you learn important terminology.

Customer Reviews

This is the best study guide out of the ones I've used in nursing school so far (med-surg, pharm, pathophysiology, ob) of the same publisher (mosby elsevier). You could basically do only the study guide, and if you look into each question good (learn why each answer choice is right or wrong), you'll have a solid knowledge of the whole chapter without actually reading it all (this is nursing school, sometimes you can't read it all!) There are some mistakes though, for example I remember one in Chapter 30 was the wrong answer. Most are correct in the chapters.

awesome study guide. i didn't want to shell out the \$300 for the book so i bought this instead.
helped me prepare for all exams

Fast shipping, just as described. Very satisfied! Thank you :)

Information is presented in an easy manner, but this book is LONG winded and waaayyy too much to read if you are on a short schedule and can be better found in any ATI book, which is clear and concise.

good one....some teachers even bring their test questions from it..

Wonderful and amazing

Doesn't really help you

Great book. Great condition.
