Customer Reviews

You don't have to live in a Craftsman-style bungalow house--as I have for nearly a decade--to appreciate the popular architectural style that flourished in the early 20th century, or this handsome book devoted to it. Interior designer Paul Duchscherer and photographer Douglas Keister have combined their talents to give the bungalow its due, defining the style and its variations, discussing its influences and its evolution. Keister has a great eye for color and design; he is a man who loves wood and makes no bones about it. Warning: you may want to talk to a real estate agent about a Craftsman of your own after looking at the beautiful homes in this volume.

Great product

One of the first copies of this book was part of the coffee table collection in a rustic bungalow we rented in North Carolina, and I loved it so much while we were there, I just had to have my own copy!! If you are interested in some of the really interesting architectural history of the "prarie style"

bungalow and the arts & crafts movement in the early 20th century, this one is a must!! Now I look for these charming homes everywhere I go!!

Excellent photos. I bought it to give me a good reference to how the interiors were constructed and decorated. Also as a reference for building the furniture and cabinetry of the period.

Very good book for anyone researching Bungalow or Craftsman interior / exterior details. Good for both someone wanting to restore an existing home or researching ideas on building a newer home to incorporate finer aspects of these beautiful old classics.

Great book.
