12-Lead ECG For Acute And Critical Care Providers

Synopsis

Written by a paramedic with experience teaching at all levels (EMT-P, nurses, etc.) this user-friendly text presents a practical, easy-to-understand system for 12-Lead ECG interpretation and assessment. Based on the nationally renowned 12-lead ECG workshop, "Multi-Lead Medics." A focus on the "need to know" information and a large number of practice cases with over 400 actual 12-leads provides students with the solid background and extensive hands-on practice that will help them gain confidence and build competence quickly.

Customer Reviews

12-Lead ECG for Acute and Critical Care Providers is a comprehensive yet concise text offering a practical, easy-to-understand approach to 12-lead interpretation and assessment. Written by a paramedic with experience teaching at all levels, this user-friendly text focuses on the need-to-know information that allows students to quickly gain an understanding of the 12lead. The large number of practice cases, with over 400 actual patient strips, provides a solid background and the extensive hands-on practice necessary to help students gain confidence and build competence quickly. Bob Page is an internationally known speaker, instructor, author, and paramedic. He developed Multi-Lead Medics®, a 12-lead ECG interpretation workshop that he has presented across the United States, Canada, and in Europe. His mission is to present high quality, innovative, informative, and entertaining educational programs for personnel involved in the emergency and

critical care of patients. He is recognized for his energetic, motivational style. Bob has authored dozens of articles on cardiology and other emergency and critical care topics.

Bob Page's Multi-Lead Medics is the trademarked 12-Lead ECG interpretation workshop developed by Bob Page, AAS, NREMT-P, CCEMT-P, I/C. His mission is to develop and present high-quality, innovative, informative, and entertaining educational programs for personnel involved in the emergency and critical care of patients.

A MUST for advanced 12 lead interpretation. Hundreds of 12 leads to practice with, each chapter broken down with easy to understand instruction on interpretation rules. Go beyond just looking for the STEMI and always remember as Bob said and it is so true; "In lead II, you have no clue!". I use this book as a reference teaching my Paramedic students (Para-pups) and have seen outstanding results when they reach the field. Samuel Peppard, EMT-P/Critical Care Paramedic/Adjunct instructor College of Central Florida

Great read! You can learn a lot from this book. I would recommend a sturdy basic understanding of your fundamentals before diving in. I hope to be in one of Bobs classes in the near future. Great way to keep sharp for your patients!

excellent seller-very pleased with purchase-fast shipping

I attended Mr. Page's lecture at our State EMS Symposium, and while the book does not match the exciting style and fun atmosphere of his presentation (difficult for any book to do that, I think) as one previous reviewer mentioned, this book does a great job teaching this now essential skill. The information is organized in short-to-the-point segments and the information is presented in a common sense format. I have read or skimmed through many books on this subject matter and for me, this book did the best job. My recommendation is that every Paramedic or critical care provider should own this textbook. Good luck! - Joe (Paramedic)

Good read.

Great book and resource to use as an adjunct to Bobs class. I try and do 4-5 strips each shift to keep that knowledge fresh in my mind. And the practice definitely helps!

A good book by Bob Page. Follows his lectures, and goes into detail on the 12 lead for medics. I think the book cost too much for what is presented.

Excellent book, really helps understand EKGs better. for all levels of care. Bob page makes it more entertaining and if one was ever to get the opportunity to see his presentation in person you should.
