PreS-This rhyming alphabet book presents the whys and hows of veganism for young children. The text makes clear what vegans consume (legumes, vegetables, fruit, grains, nuts, and seeds) and what they would avoid: "A is for animals-/friends not food./We don't eat our friends,/they'd find it quite rude." The message goes far beyond food by including information about capturing insects, clothing choices, zoos, cooking, shelters vs. pet stores, animal testing, recycling and reusing, and

gardening. A lot of information is packed into this little picture book, giving families a good jumping-off point for discussions about food, animal welfare, and the environment. The cartoon illustrations are lighthearted and full of smiling people and animals, though the most telling is sure to be the image of the young boy about to bite into a calm, but clearly perplexed, live chicken. This beast-, fowl-, and insect-friendly title will be useful as an overview for young vegans and young friends of vegans. Find a place for it.-Heather Acerro, Rochester Public Library, MN

We're a longtime vegetarian family for animal compassion reasons and plan to raise our son (now 5 months old) the same way. We preordered this book based on the premise and weren't entirely sure what to expect, but had high hopes. It was not a disappointment in any way. Beautifully illustrated with catchy rhymes and an underlying message of compassion that should be taught at any age to vegans and carnivores alike. Our son loves the pictures and sits happily in my lap while I read to him. At some point, as he gets older, this book will help open up the dialogue on many important subjects about earth stewardship and animal compassion. Really hoping this author and illustrator collaborate on additional books.

Wonderful little book promoting values of kindness towards animals and a vegan diet. My young vegan granddaughters love it. I am glad Ms. Roth's books exist to read to them as we have many vegans in our family.

This is a great book for children. The author has thoughtfully created this book to be a learning experience for older children and younger children. My daughter has been vegan since conception. I've been vegan for about 7 years (2016). This book allows my daughter to grasp concepts of our lifestyle without. The way that book has been written--- it enables parents to interact and further explain reasons that we choose to live and do things differently. My daughter is at a very inquisitive age. I know she will be asking more questions. This book answers and allows for a child to probe further into simple compassionate alternatives to things other people would likely not acknowledge. As a whole--- this book is AWESOME!

I purchased it for my son when he was 4 months old. He loves books and I wanted to get him one that went along with our lifestyle. I love this because it's not 'scary' or 'gross' for a small kid like some other vegan books are. I love that he can understand from a very young age what it means to be vegan. I'm seriously contemplating getting this for baby gifts from now on (even for non-vegans *WINK*!)

Our son is 18 months and he LOVES this book. Such a great way to teach kids at a young age the

proper ABC's hehe. Honestly though it is a perfect way to teach young kids about being vegan.

I returned this book because parts seemed a little scary for my 3 year old, but it was beautiful and would be good for a 5-8 year old maybe.

I got this as a joke for the kids of our annoyingly eco-conscious friends. They are not vegetarians but might as well be. They got a kick out of it, but then bulked when they had to read it to their kids. I'm not sure the targeted audience of the book. If it were targeting vegan kids, then its perfect. But as a service announcement/diversity awareness (i.e. some people eat tofu and not steak), it's pretty heavy handed and might expose your children to some hypocrisy they may not be ready to digest. That said, the 4 and 6 year old recipients liked it well enough but it has not achieved cult-reading status.

I was really excited about this book but i was a little disappointed. I guess I was expecting something different. My son is 2 and i was hoping it would help me explain some issues to him but not so much. It is a cute book and i like the pictures. I may try one of her other books.
