David A. Lubarsky, MD, MBA is Professor and Chair of the Department of Anesthesia, Perioperative Medicine and Pain Management at the University of Miami School of Medicine in Miami, Florida.

This is quick and efficient read- Would have been great to have when I started residency as it explains key concepts in easy to understand terms and provides focus. Great Q & A format that is easy to review by yourself and/or with a partner(s) as well.

Excellent board prep written by a master with obviously loads of experience in board prep, excellent brief presentations driving home points and amazing in depth knowledge of the subject. Voted as very useful by many of my co-examinees. Two thumbs up!!

Short, quick read that is useful for ITE or basic exam content. Could use a few supporting images and graphs

great product!

I think this is a good resource for in training exam. I used this book this year and felt it covered close to 90% of the material tested. I think certain areas such as Cardiac you will need to supplement, otherwise an excellent review of most board topics. I think for certain concepts images would have been helpful to visualize.

Regardless of who the authors are. Those who written this book seam to be experts in anesthesia. They discuss the key subjects in each topic. And lay stress on important easily missed points. You can really feel the wisdom in their questions and answers. The only limitation is that is not a book to

study from. It is a book for revision and wrap up. Great great quotes at the beginning of each chapter that would make you a better person in addition to being better anesthesiologist because of the content.
