Anatomy & Physiology (6th Edition)

Synopsis

Providing a streamlined, clear pathway through A&P Anatomy & Physiology, Sixth Edition answers the demand for a leaner version of Elaine Marieb and Katja Hoehn's best-selling Human Anatomy & Physiology while maintaining its trusted, accurate approach. This streamlined text excludes coverage of pregnancy & human development, heredity, and the developmental aspects of body systems, while providing coverage of key A&P concepts. With the newly revised Sixth Edition, Marieb and Hoehn introduce a clear pathway through A&P that helps students and instructors focus on key concepts and make meaningful connections. The new modular organization makes key concepts more readily apparent and understandable to students, and new "Why This Matters" videos help students see why the content is important not only for their course, but also for their future careers. An expanded suite of learning tools in the book and in MasteringA&P guide students through important concepts. Also available with MasteringA&P. MasteringA&P is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Instructors ensure that students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics. Students can further master concepts after class through assignments that provide hints and answer-specific feedback. With a wide range of activities available, students can actively learn, understand, and retain even the most difficult concepts. Note: You are purchasing a standalone product; MasteringA&P does not come packaged with this content. Students, if interested in purchasing this title with MasteringA&P, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MasteringA&P, search for: 0134201663 Anatomy & Physiology Plus MasteringA&P with eText -- Access Card Package, 6/e Package consists of: 0134283384 / 9780134283388 MasteringA&P with Pearson eText -- ValuePack Access Card -- for Anatomy & Physiology, 6/e 0134156412 / 9780134156415 Anatomy & Physiology, 6/e

Book Information

Customer Reviews

For Elaine N. Marieb, taking the student's perspective into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy and physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience that has informed the development of the unique perspective and accessibility for which her publications are known. Dr. Marieb has partnered with Benjamin Cummings for over 30 years. Her first work was Human Anatomy & Physiology Laboratory Manual (Cat Version), which came out in 1981. In the years since, several other lab manual versions and study guides, as well as the softcover Essentials of Human Anatomy & Physiology textbook, have hit the campus bookstores. This textbook, now in its 10th edition, made its appearance in 1989 and is the latest expression of her commitment to the needs of students studying human anatomy and physiology. Dr. Marieb has given generously to colleges both near and far to provide opportunities for students to further their education. She contributes to the New Directions, New Careers Program at Holyoke Community College by funding a staffed drop-in center and by providing several full-tuition scholarships each year for women who are returning to college after a hiatus or attending college for the first time and who would be unable to continue their studies without financial support. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and has underwritten renovation and updating of one of the biology labs in Clapp Laboratory at that

college. Dr. Marieb also contributes to the University of Massachusetts at Amherst where she generously provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory. Recognizing the severe national shortage of nursing faculty, she underwrites the Nursing Scholars of the Future Grant Program at the university. In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor. Dr. Marieb is an active member of the Human Anatomy and Physiology Society (HAPS) and the American Association for the Advancement of Science (AAAS). Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Benjamin Cummings Interactive Physiology CD-ROM series. When not involved in academic pursuits, Dr. Marieb is a world traveler and has vowed to visit every country on this planet. Shorter term, she serves on the scholarship committee of the Women's Resources Center and on the board of directors of several charitable institutions in Sarasota County. She is an enthusiastic supporter of the local arts and enjoys a competitive match of doubles tennis.

Dr. Katja Hoehn is a professor in the Department of Biology at Mount Royal University in Calgary, Canada. Dr. Hoehn's first love is teaching. Her teaching excellence has been recognized by several awards during her 21 years at Mount Royal University. These include a PanCanadian Educational Technology Faculty Award (1999), a Teaching Excellence Award from the Students' Association of Mount Royal (2001), and the Mount Royal Distinguished Faculty Teaching Award (2004). Dr. Hoehn received her M.D. (with Distinction) from the University of Saskatchewan, and her Ph.D. in Pharmacology from Dalhousie University. In 1991, the Dalhousie Medical Research Foundation presented her with the Max Forman (Jr.) Prize for excellence in medical research. During her Ph.D. and postdoctoral studies, she also pursued her passion for teaching by presenting guest lectures to first- and second-year medical students at Dalhousie University and at the University of Calgary.

Dr. Hoehn has been a contributor to several books and has written numerous research papers in Neuroscience and Pharmacology. She oversaw a recent revision of the Benjamin Cummings Interactive Physiology CD-ROM series modules, and coauthored the newest module, The Immune System. Following Dr. Marieb's example, Dr. Hoehn provides financial support for students in the form of a scholarship that she established in 2006 for nursing students at Mount Royal University. Dr. Hoehn is also actively involved in the Human Anatomy and Physiology Society (HAPS) and is a member of the American Association of Anatomists. When not

teaching, she likes to spend time outdoors with her husband and two sons, compete in triathlons, and play Irish flute. ã ã

This book could have been a great study guide. I love the content and how it was presented. But I had to return it because there were soooo much pages missing! It was cheap but I found cheaper ones with better quality than this one. Aside from pages missing, the cover was ripped. It's like the seller is selling something like electronics for cheap but it's a total crap or broken and you can't use it.

I now see that it lists loose leaf in the description AFTER you open it, but I obviously missed it. Thought I'd save someone else from possibly ordering the wrong thing if you were thinking this was the actual book. I gave it 2 stars because it is useful if you just want copy paper and they did note that it was loose leaf, but I think it should say that on the main portion of the description. Was also VERY disappointed that I tried to cancel the order immediately after the order was placed and I kept getting a message "We're sorry. An error occurred when we tried to process your request. Rest assured, we're working to resolve the problem as soon as possible. Please try again in a few minutes." If they didn't want to cancel and instead want me to eat the cost of shipping the order just say so ... don't tell me there's some sort of mysterious error.

I am extremely happy with this purchase! I received my package two days after ordering it. The package included the A&P text book, A brief atlas of the human body, the disk, and the access code for mastering AP! I'm so glad it came with everything I needed for school. The purchase saved me a lot of money I would have spent in the campus bookstore.

I received this book in very poor condition. Its about to fall apart. I cant even put it into my bookbag because Im scared it will shift around inside and damage it even more.

I have to use this book for a grad school pre-req A&P course. The textbook is incredibly informative--moreso than the one my mother had to use for her A&P 1&2 courses when she went to become a MA. The only drawback is that the authors can get a little TOO detailed and can sometimes forgo important details that would otherwise make the topic a bit more accessible. I want to go into nutrition, so a lot of the information I get bombarded with does not apply to the field I want to enter. It's unfortunate, because I am taking an online course, so I need to treat each and every

section equally, which means obtaining a general understanding of everything the authors present to you. It's not a bad thing, trust me, but it can get overwhelming at times and I know I will not remember a lot of the information once my course is over. Love the supplemental website that comes with this book. Have utilized said website for test reviews multiple times now and have maintained an A in the course because of all the extra practice. One more section for A&P 1 and then I am done for the semester, woo hoo!

Very in-depth A&P textbook. This is not the most recent version, but it is the one required for my class for some reason. It is an excellent reference and provides details about how and why the body works the way it does. I am reading it from cover to cover and enjoying it all.

Love the pictures and tables. They help explain what we need to understand. Wish there was more questions in the review section to help me read and wish there were answers for the short answer essay questions. Otherwise it is a great book.

I really needed this book for my class that begins on 6/3. First of all it cost so much less than what I would have paid if I bought this book from the school bookstore and was in perfect condition. Secondly, I received the book before my class started so kudos to the seller for sending it as quickly as they did.
