Raymond A. Serway is Professor Emeritus at James Madison University. He earned his doctorate at Illinois Institute of Technology. Among his accolades, he received an honorary doctorate degree from his alma mater, Utica College, the 1990 Madison Scholar Award at James Madison University (where he taught for 17 years), the 1977 Distinguished Teaching Award at Clarkson University and the 1985 Alumni Achievement Award from Utica College. As a Guest Scientist at the IBM Research Laboratory in Zurich, Switzerland, Dr. Serway worked with K. Alex Müller, who shared the 1987 Nobel Prize in Physics. He also was a visiting scientist at Argonne National Laboratory, where he collaborated with his mentor and friend, the late Sam Marshall. In addition to this text, Dr. Serway is the co-author of COLLEGE PHYSICS, Eleventh Edition; PRINCIPLES OF PHYSICS, Fifth Edition; ESSENTIALS OF COLLEGE PHYSICS; MODERN PHYSICS, Third Edition; and the high school textbook PHYSICS, published by Holt McDougal. He has published more than 40 research papers in the field of condensed matter physics and has given more than 60 presentations at professional meetings. John W. Jewett Jr. is Emeritus Professor of Physics at California State Polytechnic

University, Pomona. He earned his undergraduate degree in physics at Drexel University and his doctorate at The Ohio State University, specializing in optical and magnetic properties of condensed matter. Dr. Jewett began his academic career at Richard Stockton College of New Jersey, where he taught from 1974 to 1984. Active in promoting effective physics education, he has received four National Science Foundation grants in physics education, and he helped found and direct the Southern California Area Modern Physics Institute (SCAMPI) and Science IMPACT (Institute for Modern Pedagogy and Creative Teaching). Dr. Jewett's honors include the Stockton Merit Award at Richard Stockton College in 1980, selection as Outstanding Professor at California State Polytechnic University for 1991-1992 and the Excellence in Undergraduate Physics Teaching Award from the American Association of Physics Teachers (AAPT) in 1998. In 2010, he received an Alumni Lifetime Achievement Award from Drexel University in recognition of his contributions in physics education. He has given over 100 presentations both domestically and abroad, including multiple presentations at national meetings of the AAPT. Dr. Jewett is the author of THE WORLD OF PHYSICS: MYSTERIES, MAGIC, AND MYTH, which provides many connections between physics and everyday experiences. In addition to this text, he is co-author of PRINCIPLES OF PHYSICS, Fifth Edition, and GLOBAL ISSUES, a four-volume set of instruction manuals in integrated science for high school. Dr. Jewett enjoys playing keyboard with his all-physicist band, traveling and collecting antique quack medical devices. Most importantly, he relishes spending time with his wife, Lisa, and their children and grandchildren.

Informational, but takes simple concepts and makes them complicated. Also, for the amount of money you are going to spend, you will be surprised when you realize that although the book will reference several appendices and the table of contents lists multiple ones, when you turn to the back, there is only Appendix A; all of the others are missing.

Whole book, not split into separate volumes. Great problems, plenty of examples, answers to odds in back of the book... no complaints

Well written and easy to follow

Have not read it all yet but so far I like the logical approach, extremely thorough text. Even so I can't get access to the online material as an private person and thats why Im not giving it five stars.

Physics isn't really my thing and my professor doesn't really explain the concepts too well and neither does this book honestly. I thought it would be a better break down but it's just a bunch of stuff by definition. I was really hoping it'd be written in a way where I could comprehend better ordered wrong book, had to return
