I have made kidney stones for 40 years. I was the first woman in the USA to have ESWL to break a large stone into very small pieces. The source of my stones could not be determined until I found Dr. Schulsinger. He is not only a brilliant research urologist, he is a kind and compassionate doctor. His book is the most comprehensive, detailed, and helpful account of every aspect of kidney stone

prevention, formation, and treatment. While this book is expensive, it is worth the investment!
