The Agnostic Lawyer: Clarence Darrow Explains His Disbelief In God, Christianity, And The Bible

Synopsis

Before there were the famous books of Dawkins, Dennett, Hitchens, and Harris on atheism, there was Clarence Darrow's brilliant witty essays on his disbelief in God, Christianity, and the Bible. This book contains several of Darrow's most witty and penetrating essays on his non-belief. Highly entertaining. As Dr. Andrea Diem-Lane explains: When Spencer Tracy, playing Clarence Darrow in the movie *Inherit the Wind*, takes the Bible in one hand and *On Origin of Species* in the other and clasps them together side by side to illustrate how science and religion can work together, one is led to assume that Darrow was indeed a theist evolutionist. But was he? Hollywood's portrayal of him in this classic film is obviously suspect. Instead of supporting theism, Darrow's own writings clearly show his strong support for agnosticism (literally, "not knowing"). This philosophical position--the argument that one cannot know ultimate or metaphysical truths or even whether there are any--fits in line with the teachings of Socrates, Hume, Darwin, Einstein and many other philosophers and scientists today. Science is inherently agnostic. As a discipline it tends to only investigate those claims that can, in theory, be tested and proven. Indeed, Karl Popper, a well known philosopher and historian of science, has stressed that for something to be of scientific merit it must be potentially falsifiable. In other words, science doesn't work by proving itself right, but rather by demonstrating where, when, and how it can potentially be wrong. In this way, it can actually correct prior assumptions and make further testable hypothesis, which can either withstand rational scrutiny or be shown to be lacking in sufficient evidence. When a metaphysical (above or beyond the empirical world) claim is made, however, there is usually no way to test it and prove beyond a reasonable doubt that such a thing actually exists. Believing it to be so is insufficient in the realm of science. Naturally, a question arises: Does the theory of evolution necessitate an agnostic worldview? Or, can one believe in theism and still be an evolutionist such as Kenneth Miller, author of *Finding Darwin's God*? Yes, one can personally believe in any religious idea one wishes to and even connect such to a scientific paradigm. But saying this also means that one could attach any sort of nonsense to science and try to suggest that they are not in conflict. I could, for instance, say that believing in Gumby and Pokey as Divine Avatars (famous animated claymation figures popular on American television) doesn't conflict with Darwin's idea of natural selection. But making such a banal statement doesn't then justify claiming that one's chosen religious belief is a legitimate scientific position that warrants equal treatment in a Biology course. As Carl Sagan rightly said, "extraordinary claims demand extraordinary proof." And since religion, in general, is either unwilling or unable to provide such proofs to the scientific community, it is perhaps inevitable that the only honest position one can

hold and still be true to the spirit of science is, in fact, agnosticism. Clarence Darrow, even though not trained as a scientist but rather as a lawyer, realized this truth early on and became a tireless champion of allowing the “unknowing” postulate in science to permeate into one’s daily life. As he himself so wittingly observed, “An agnostic is a doubter. The word is generally applied to those who doubt the verity of accepted religious creeds of faiths. Everyone is an agnostic as to the beliefs or creeds they do not accept. Catholics are agnostic to the Protestant creeds, and the Protestants are agnostic to the Catholic creed. Any one who thinks is an agnostic about something, otherwise he must believe that he is possessed of all knowledge.”

Book Information

Paperback: 116 pages

Publisher: Mount San Antonio College/Philosophy Group; Second edition (January 28, 2016)

Language: English

ISBN-10: 1565433416

ISBN-13: 978-1565433410

Product Dimensions: 6 x 0.3 x 9 inches

Shipping Weight: 8.2 ounces (View shipping rates and policies)
