# Anthropology Of Race: Genes, Biology, And Culture (School For Advanced Research Advanced Seminar Series)

## Synopsis

What do we know about race today? After years of debate and inquiry by anthropologists, the question remains fraught with emotion and the answer remains complicated and uncertain. *Anthropology of Race* confronts the challenge of formulating an effective rejoinder to new arguments and new data about race, and attempts to address the intense desire to understand race and why it matters.

## Book Information

Series: School for Advanced Research Advanced Seminar Series

Paperback: 360 pages

Publisher: School for Advanced Research Press; first edition (September 9, 2013)

Language: English

ISBN-10: 1934691992

ISBN-13: 978-1934691991

Product Dimensions: 6 x 0.7 x 9 inches

Shipping Weight: 10.4 ounces (View shipping rates and policies)

Average Customer Review: 3.3 out of 5 stars 2 customer reviews

Best Sellers Rank: #391,081 in Books (See Top 100 in Books) #273 in [Books > Politics & Social Sciences > Anthropology > Physical](#) #2151 in [Books > Science & Math > Evolution](#) #3313 in [Books > Politics & Social Sciences > Anthropology > Cultural](#)

## Customer Reviews

*Anthropology of Race* examines the often disregarded intersectionality of genes, biology, and culture in the formation of race. With bold and innovative analysis, the authors challenge us to consider and then reconsider its biosocial and biocultural foundations. This volume creatively adds to the field a complex and provocative interpretation of the anthropology of race. --Lee D. Baker, Duke University  
Mukhopadhyay and Moses urged anthropologists in the 1990s to look at the biocultural model as a way to unravel the racial paradigm in the United States. This exceptional, innovative, and carefully crafted volume follows that tradition and takes the notion of the biocultural model to a whole new theoretical and empirical level. It is a timely and very important volume for anthropology and for our society. --Yolanda T. Moses, UC Riverside  
A must-read for scientists and medical practitioners, this volume builds on the vitally important humanistic and social scientific work interrogating racial processes to deconstruct the popular categories that animate our understanding of human difference. --Deborah A. Thomas, University of Pennsylvania  
Race is a complex

subject...and this book makes a good start in formulating ways to continue a dialogue within anthropology and across other disciplines. --John H. Relethford, American Journal of Human Biology  
Hartigan and the contributors to this volume illustrate clearly some of the conflicting and diverse ways in which race is conceived and employed as a thing and a process, and ultimately, the work the different ways of knowing race does in science, health care, and everyday life.... This volume is useful for anyone interested in a rich biocultural mix of insights into race today. --Alan H. Goodman, Journal of Anthropological Research, vol. 71, 2015

John Hartigan Jr. is Associate Professor of Anthropology at the University of Texas, Austin. He is the author of *Racial Situations: Class Predicaments of Whiteness in Detroit*.

Rip off... Textbooks are a scam. Wish our education systems would find a better way...

Interesting, but spotty in places.
